Freelance MERN Stack Developer

Jan 2025 - Present

- Developed and deployed custom web applications using MongoDB, Express.js, React, and Node.js (MERN).
- Created **Prodmatrix Software**, a product management system to streamline inventory and operations.
- Built interactive UIs and responsive designs using React, Bootstrap, and Tailwind CSS.
- Integrated APIs, handled authentication, and managed databases for multiple client projects.

PROJECTS

G-Mart - Product Delivery Application

- This Product Delivery Application is built using the MERN stack .The front-end uses React with Tailwind CSS for a responsive and user-friendly interface.Node.js and Express handle API routing and backend logic for seamless delivery management. MongoDB stores user, product, and shipment data efficiently with Mongoose for modeling. The system enables real-time tracking, order management, and streamlined delivery operations.

Medicine Recommendation System

- Built a medicine recommendation engine suggesting generic and branded medicines based on symptoms and usage. Used NLP techniques with TF-IDF and cosine similarity for accurate recommendations. Implemented data processing and model logic using Python, Pandas, and Scikit-learn. Developed an interactive user interface using Streamlit.
